

Akhil Birru

Full Stack Developer | Angular · Spring Boot · PostgreSQL · AI / LLM (Claude)

Bengaluru, India | birruakhil1526@gmail.com | linkedin.com/in/akhil-birru | github.com/birruakhil1526

PROFESSIONAL SUMMARY

Full Stack Developer with 5+ years of experience building scalable, production-grade web applications across frontend, backend, and AI-driven workflows. Strong in Angular (up to v19), TypeScript, and RxJS, with hands-on Java, Spring Boot, PostgreSQL, and YugabyteDB experience. Built AI-powered developer tools using LLMs (Claude) for automated test generation and bug resolution. Led a development team, implemented secure Single Sign-On (SSO), and drove architecture decisions that improved performance, scalability, and maintainability.

KEY HIGHLIGHTS

- Built AiTDP features – an in-house Claude (LLM) orchestration platform for AI test generation and automated bug fixing.
- Full stack ownership of epics on fintech lending products (LOS, LMS, Collections): Spring Boot, PostgreSQL/YugabyteDB, Angular 19.
- Implemented secure Single Sign-On (SSO) and led a development team; recognised with a Certificate of Appreciation.

PROFESSIONAL EXPERIENCE

Senior Software Engineer | Trustt, Bengaluru

Oct 2024 – Present

- Delivered features across 3 fintech lending products – Loan Origination (LOS), Loan Management (LMS), and Loan Collection System (LCS) – plus AiTDP, an in-house AI (Claude) orchestration platform.
- AiTDP: independently designed and built an AI system that generates unit test cases for Java, Angular, and Android applications, delivered as editor plugins for developers.
- AiTDP: architected an LLM-based (Claude) workflow that automates bug detection and resolution, reducing manual debugging effort for the engineering team.
- Own epics end to end – Spring Boot backend services with PostgreSQL and YugabyteDB, plus the supporting Angular UI.
- Built and maintained scheduled CRON jobs in Spring Boot for automated backend batch processing.
- Developed complex Angular 19 modules (65+ lazy-loaded features) with reusable base classes for CRUD, maker-checker approval workflows, and role-based permissions.

Software Developer | Maveric Systems, Bengaluru

Mar 2023 – Sep 2024

Project: Delivery Excellence Dashboard – platform for employees to report project status and feedback, with scoring and stakeholder tracking.

- Designed and developed critical modules from the ground up, including secure Single Sign-On (SSO).
- Led a development team for 3 months as Lead Engineer, delivering all planned tasks on schedule.

- Drove architecture decisions and fixed performance bottlenecks, improving load times, scalability, and maintainability.
- Built responsive Angular interfaces from UX/UI wireframes and integrated RESTful APIs and third-party services.
- Conducted code reviews and mentored junior developers on Angular best practices and coding standards.
- Received a Certificate of Appreciation for outstanding contribution and leadership on the project.

Associate – Backend Developer | Accenture, Hyderabad

Apr 2021 – Oct 2022

Project: Inventory and supply-chain web application for an international agricultural company – tracking product stock, items in transit, material storage, and processing stages.

- Developed backend services and RESTful APIs in Java and Spring Boot for inventory, in-transit tracking, and material processing modules.
- Wrote SQL queries and data access logic for product stock, storage, and processing data.
- Worked closely with frontend developers and designers to define API contracts and integrate services end to end.
- Documented APIs (Swagger) and technical specifications to support knowledge sharing and project continuity.

TECHNICAL SKILLS

Frontend: Angular (v19), TypeScript, JavaScript, RxJS, ReactJS, Redux, HTML5, CSS3, SCSS, Angular Material, Bootstrap

Backend: Java, Spring Boot, CRON / scheduled jobs, Node.js, RESTful APIs, Swagger

AI / LLM: LLM workflow orchestration, Claude API, prompt engineering, AI-powered developer tools, editor plugins

Databases: PostgreSQL, YugabyteDB (distributed SQL), SQL, MongoDB

Testing: Karma, Jasmine, unit testing

Tools & DevOps: Git, Jenkins, Docker, Jira, VS Code, IntelliJ

Practices: System design, SSO / authentication, role-based access control, lazy loading, Agile / Scrum, code reviews

EDUCATION

B.Tech, Electronics and Communication Engineering

2015 – 2019

Christu Jyothi Institute of Technology and Science

CERTIFICATIONS

PGP Full Stack Software Engineering; Angular; Java; JavaScript; SQL
